TV. The Internet. The mall. Everywhere we look, we see advertisements that urge us to buy, buy, buy. In today's consumer society, we are under constant pressure to shop. Of course, most people only buy what they need and what they can afford. However, there are some people, called shopaholics, who cannot control their desire to spend money and buy things. What are the symptoms of a shopaholic? People with this problem often spend hours and hours shopping on the Internet or the mall. Their closets are full of clothing and jewelry they have never worn, with the price tags still on them. Their home may be packed with shopping bags and boxes that overflow with things that they bought but never used: kitchen gadgets, books, electronics, DVDs, and dozens of other items. Many shopaholics are aware of this problem, but when they go to a

them through the hard times and celebrate in their happy times. A family always supports and backs each other. They **stand up** for each other in front of a third party trying to harm them proving their loyalty.

Most importantly, the things one learns from their family brings them closer. For instance, we learn how to deal with the world through our family first. **They** are our first school and this teaching strengthens the bond. **It gives us reason to stand by each other as we share the same values.** One cannot emphasize enough on the importance of family. They play a great role in our lives and make us better human beings. The one lucky enough to have a family often do not realize the value of a family. However, those who do not have families know their worth. A family is our source of strength. It teaches us what relationships mean. They help us create meaningful relationships in the outside world. The love we inherit from our families, we pass on to our independent relationships. Moreover, families teach us better communication. When we spend time with our families and love each other and communicate openly, we create a better future for ourselves. When we stay connected with our families, we learn to connect better with the world.

Finally, families teach us patience. It gets tough sometimes to be patient with our family members. Yet we remain so out of love and respect. Thus, it teaches us patience to deal better with the world. Families boost our confidence and make us feel loved. They are **the pillars of our strength** who never fall instead keep us strong so we become better people.
